

School ERP System

The client is a leading chain of schools in India. They have multiple schools at multiple locations. They were using some 03rd party ERP system and was not very happy with performance and services provided by ERP providers.

GOPHERS worked along with multiple stake holders from school management team and reviewed entire system. It took around 4 months to build entire ERP system. We have deployed cross functions team of Business Analyst, Project Manager, Back End Developers, Front End Developer, Test Engineers and DevOps experts.

Key Features:
